A. Strategy Dominance (ε = 0.35 fixed)
Critical threshold σ*
Independent Favored
Aggregation Favored
n* = 25
Aggregation Size (n bands)
Environmental Uncertainty (σ)
← Independent | Aggregation →
B. Critical Threshold vs. Aggregation Size
ε = 0.15 (low)
ε = 0.35 (Poverty Point)
ε = 0.50 (high)
n* = 25
Larger aggregations lower the threshold
Critical Threshold (σ*)
Aggregation Size (n bands)
